

Wireframes

From the images above, chose a wireframe to guide your design for today's project.
Remember that your final project must include:

- ☐ A navigation bar with **About**, **Projects**, and **Contact** pages
- ☐ Gallery of projects created with flexbox - you may use random images in place of project screenshots for now with the random image link: <https://picsum.photos/> or you may use images that mean something to you.
- ☐ Information about you in place of the given placeholder
- ☐ A **My Projects** button (doesn't need to be functional)
- ☐ A **Contact Me** button (doesn't need to be functional)
- ☐ Link navigation items to new HTML pages

Some choices are easier than others, pick something that feels right to you.
